

## Part 1: Practical Task 1

1] A screenshot of the displayed Github version after successful installation.

A screenshot of a Windows command prompt window. The title bar reads "Administrator: C:\Windows\system32\cmd.exe". The command prompt shows the user 'dell' at the 'C:\Users\dell' directory. The command 'git --version' has been entered, and the output is 'git version 2.44.0.windows.1'. The prompt is now 'C:\Users\dell>'.

```
C:\Users\dell>git --version
git version 2.44.0.windows.1
C:\Users\dell>
```

2] The URL of my GitHub profile

<https://github.com/parmaninisha05>

3] A link to my byb\_project repository (this link is for Part 2: Practical Task 1)

[https://github.com/parmaninisha05/byb\\_project/tree/master](https://github.com/parmaninisha05/byb_project/tree/master)

READme wala

4] **PART 2 Practical task 2-** a link to your repository with the repo name spelt exactly the same as your username,

<https://github.com/parmaninisha05/parmaninisha05>

(Here is my Readme file link)

<https://github.com/parmaninisha05/parmaninisha05/blob/main/README.md>

\*\* (Nature1.jpg is in the same folder where my Readme.md is)

\*\* My reference is github docs.
